

AI Receptionist & Voice Agent

Replaces your inbound receptionist — answers every call, books appointments, sends confirmations.

Up to 80%

of calls handled without a human

01 — WHAT THIS ACTUALLY IS

Every time your phone rings and nobody picks up, that is a customer you have lost. Most small businesses miss 30 to 40% of their inbound calls — after hours, during busy periods, or when the team is with another customer.

An AI voice agent is a phone system that answers every single call, in a natural human-sounding voice, 24 hours a day, 7 days a week. It does not put people on hold. It does not say press 1 for this, press 2 for that. It has a real conversation — it listens to what the caller wants, answers their questions, books their appointment, and sends them a confirmation by text.

For your team, nothing changes in how they work. They just stop missing calls. The agent handles routine ones automatically and escalates anything complex to a real person immediately.

After we go live, you get a simple dashboard showing every call — who called, what they asked, what the agent said, and whether a booking was made. You are always in the loop.

02 — HOW WE BUILD IT, STEP BY STEP

1

Discovery call

What we do: We run a 60-minute call with you to learn your business — every service you offer, your pricing, your hours, and your most common customer questions.

Your role: You join the call and walk us through how your business works today.

Duration: *1–2 days*

2

Agent training

What we do: We write the agent's full script — how it greets callers, what it says about your services, how it handles edge cases, and when to escalate to a human. We set the voice and tone.

Your role: You review the written script and flag anything that sounds wrong.

Duration: *2–3 days*

3

Calendar and SMS connection

What we do: We connect the agent to your Google Calendar so it only offers real available slots. We set up SMS confirmations so every booked caller gets a text with their appointment details.

Your role: You share your Google Calendar access with us.

Duration: *1–2 days*

4

Live testing

What we do: We run 30+ test calls covering every scenario — bookings, FAQs, after-hours calls, and edge cases. We fix anything that does not work perfectly.

Your role: You call the test number yourself and tell us what you think.

Duration: *2 days*

5	Launch and monitoring What we do: We go live with your real phone number and monitor every call for the first 7 days, making tweaks based on real data. Your role: You keep running your business. We handle the rest. Duration: <i>Ongoing</i>
---	---

03 — WHAT YOU NEED TO GIVE US

- Your business name and address
- Full list of services and prices
- Your working hours
- Your 10 most common customer questions and your answers to them
- Google Calendar access (for booking)

04 — WHAT YOU GET AT THE END

- A live phone number that answers every call, 24/7
- A voice agent trained specifically on your business
- Real-time booking directly into your calendar
- SMS confirmations sent to every caller who books
- A call log dashboard showing every interaction
- 7 days of live monitoring with us after launch

05 — HOW LONG DOES THIS TAKE

Week 1	Week 2	Week 3
· Discovery call	· Calendar connection	· Launch
· Agent training	· SMS setup	· 7-day monitoring
· Script approval	· Live testing	· First improvements

06 — TOOLS WE USE, IN PLAIN TERMS

Every tool below is explained in plain English — no technical knowledge required to understand this.

Vapi.ai	The system that runs the voice conversation — it listens, thinks, and speaks in real time.
Twilio	The phone infrastructure — how calls get routed to the agent and how your number is managed.
ElevenLabs	The voice engine — makes the agent sound natural and human, not robotic.

Google Calendar	Connects to your calendar so bookings go in automatically without double-booking.
SMS gateway	Sends confirmation text messages to callers after they book an appointment.

07 — INVESTMENT

Custom pricing	Ongoing support
Tailored to your business	Get in touch for a quote

- Hosting and infrastructure costs
- Call monitoring and monthly script improvements
- Unlimited FAQ and service updates

No lock-in. You own 100% of everything we build.
